## Play value

Our Transparent Towers are a very special play experience. Intermediate floors create small rooms that invite the children to hide away and engage in different kinds of role-playing games. The playroom in the bottom part of the tower offers a small bench and additional incentives for playing. A ladder installed on the outside can be used to climb up to the upper playing surface. The tower has a roof, and there is a passageway that connects the lower level with the upper one. Thanks to the gaps between the claddings, the towers are "transparent", making them appear cosy and at the same time light and open.

## Planning information
