

Function and Play value

We recommend installing a play station at the start of educational water trails, fields of experience, and also in entrances to playgrounds, where they serve the purpose of preparing the arriving participant for the following sensory and perceptive experiences. The play station "Listening to Water" is suitable for this purpose. With this installation visitors are introduced to the natural sounds coming from a watercourse: dripping, murmuring, gurgling.

Suitable

- for footpaths near watercourses, parks, health resort gardens
- for entrances and reception areas

Listening to Water graubner Play Stations for Developing the Senses

Acoustic effect	very soft
Vandalism	not vulnerable
