

Play value

This half-shell is a very special piece of playground equipment and design element at the same time. Two or more of them can be arranged to create a line, corner or any other form – creativity is the only limit. You also have the choice between various pieces of supplementary equipment, such as a rotating disc, bench or other modules as shown in the pictures. The cosiness of the niches provides the children with enough space for role-playing games.

In addition to providing play offers, the half-shell can serve as an attractive space divider which may be used to define different play areas or as a visual and noise barrier for playgrounds located on roads.

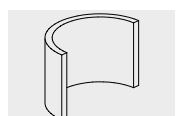

Curve

Fundamental characteristics

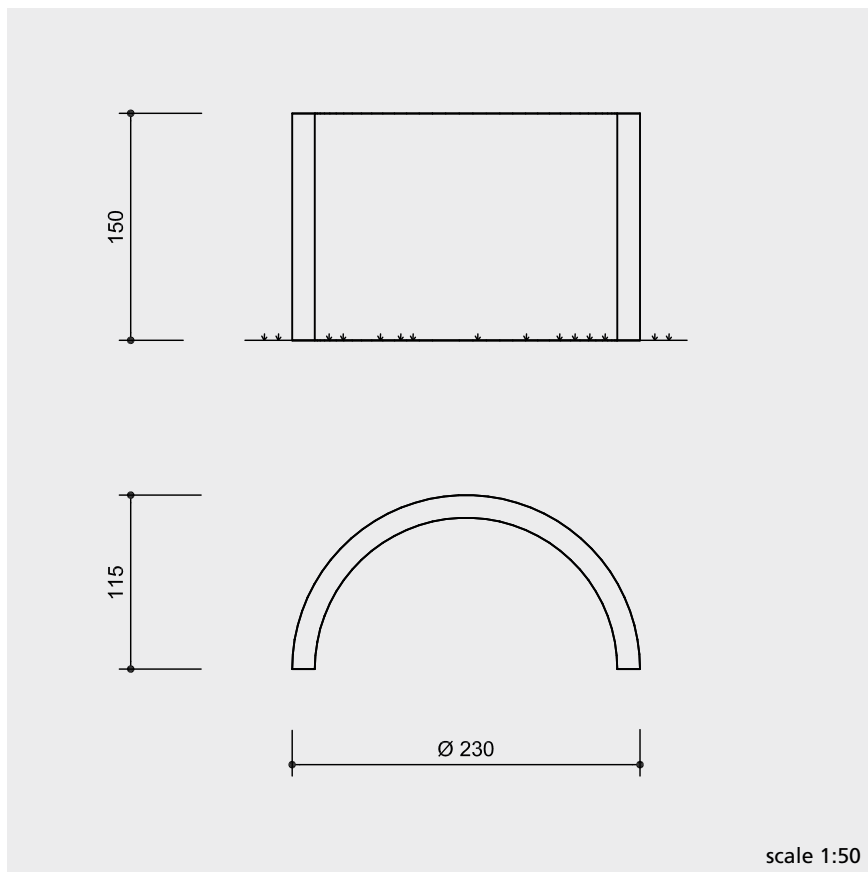

- the space-defining design appeals to the senses
- functional design
- different play offers
- individual elements can be freely combined

Suitable

- for children from 3 years of age
- for public playgrounds
- playgrounds situated near houses
- kindergartens/nurseries
- schools
- children's homes
- child therapy centres
- parks
- exhibitions
- leisure parks

7.89500

Technical information

curved wall made of self-compacting concrete C 40/50,
grain size 0 to 16 mm, sand-blasted surface

Dimensions

(small deviations possible)

height	1.50 m
length	2.30 m
width	1.15 m
weight	2000 kg
wall thickness	0.15 m

scale 1:50

safety check according to EN 1176

Components

- 1 element
- 2 sling bends
- 2 concealed heads

Optional elements

- rotating discs (different patterns)
- sound wall
- bench
- other optional elements on request

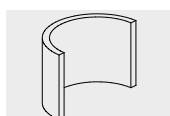

Installation information

Surfacing requirements
must be able to take the load

Foundations
none

Recommended space
including safety distances: 530 x 415 cm

Attention:
Exact measurements may vary; for all installation dimensions refer to current assembly instructions.
Technical changes reserved.
