

**Play value**

The arrangement of these large basins has a strong aesthetic value. They serve as „mud table“ and water basin at the same time. Furthermore, their durability is extremely good. Thanks to the run-outs on one or two sides of the dish, it is possible to combine the dishes to become a water path with a variety of flow possibilities. It is possible to dam up a large quantity of water within the deep, round storage basin. When opening the seals, the force of the concentrated flow of water can be used for driving a water wheel.

**Fundamental characteristics**

- high-quality design
- incentive for playing: water, round shape, locking elements
- movement: fine motor activity, accompanying the water flow

**Suitable**

- for children from 3 years
- for all water play areas
