

**Play value**

Play combinations in children's environments are particularly homely if versatile roof and building shapes offer opportunities for discovery and diversity for the eyes. The nicely shaped Hexagonal Hut makes a good centre-piece for a play area. Our different play huts are basic elements which can be combined with many linking elements. On the ground floor, there are cosy rooms for role play. Linking elements, by themselves also play equipment, can start from the upper storey and lead to other constructions or to a hill. Interesting linking elements are, for instance, rope or suspension bridge or chain path.

**Fundamental characteristics**

- child proportions according to ergonomic requirements
- one or two play levels
- natural wooden surface which appeals to the senses
- variable basic elements offering many opportunities for combination
- incentive for playing: role games in small, cosy rooms
- movement: climbing

**Suitable**

- for children from 3 years
- for playgrounds situated near houses  
nurseries  
public playgrounds
