

Play value

The wooden posts of the Rope Pyramid carry and virtually protect a net structure in which children love to sit or lie together. They also enjoy climbing to the top of this attractive piece of equipment via the nets. And the balancing rope below the open front of the net structure invites them to carry out little acrobatic exercises and promotes their sense of balance.

Model as design example

Example image: Surfacing must correspond to a fall height of ≤ 2.00 m.

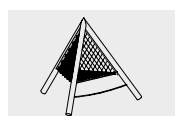

Fundamental characteristics

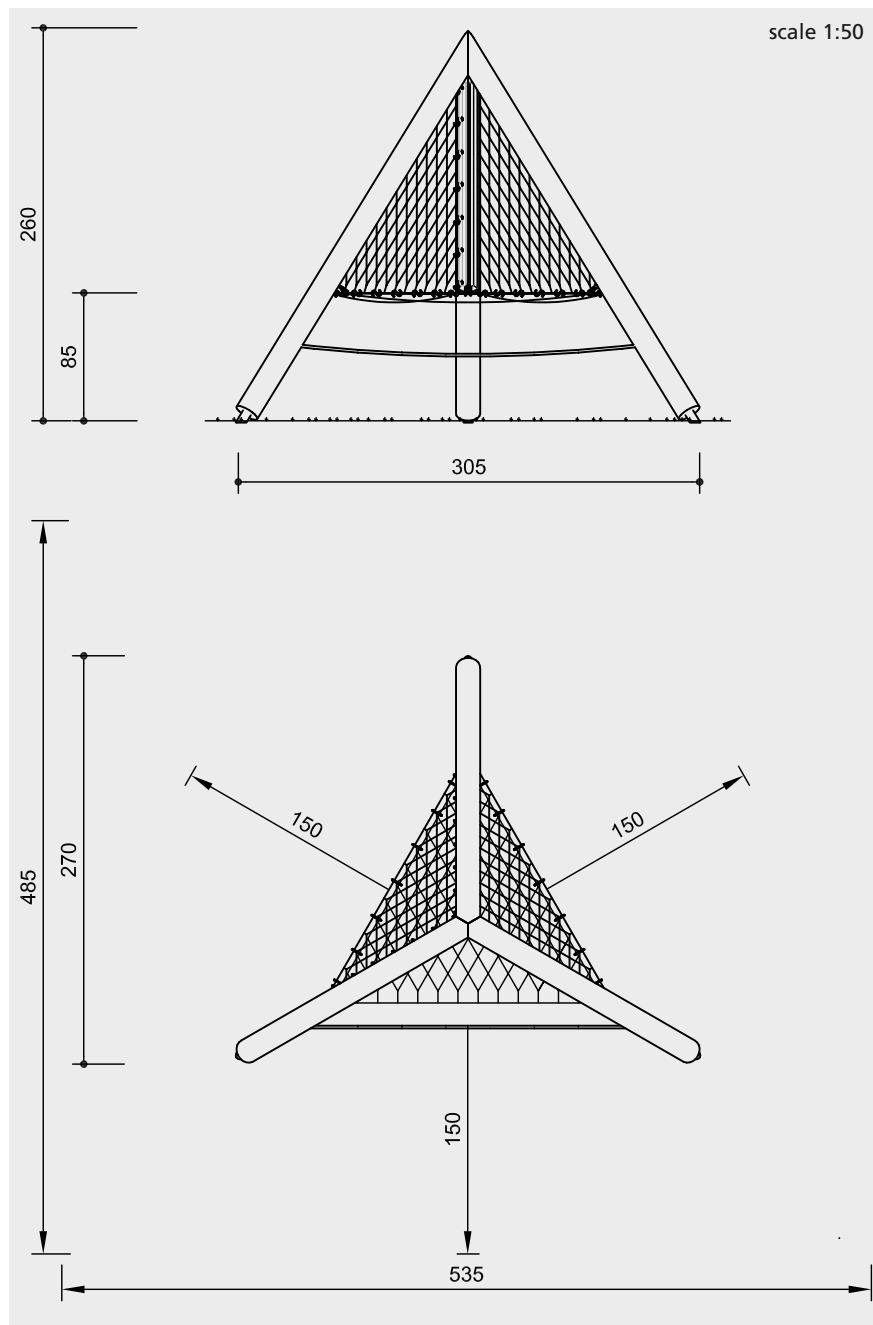

- child-oriented dimensions according to ergonomic criteria
- very appealing design
- exercise activity: climbing, sitting, balancing

Suitable

- for children from 6 years of age
- for public playgrounds
- playgrounds situated near houses
- kindergartens/nurseries
- children's homes
- child therapy centres

Rope Pyramid

safety check according to EN 1176

Components

- 3 stand posts with steel feet
- 3 fine-meshed nets
- 1 rope

Installation information

Surfacing requirements corresponding to a fall height of ≤ 2.00 m (please refer to price list for more detailed information)

Foundation
3 items 50 x 50 x 50 cm
excavation depth 70 cm

Attention:
Exact measurements may vary; for all installation dimensions refer to current assembly instructions.
Technical changes reserved.

Technical information

equipment of non-impregnated mountain larch

de-barked posts
posts de-barked posts, Ø 18 to 21 cm

concealed head
large surface for pressure distribution, prevents water from getting inside, protects the bolt head

anchoring to the ground
all parts used for anchoring to the ground made of hot-dip galvanised steel

Balancing rope:

Corocord® rope special ropes of "Hercules type"
six-strand Corocord® rope of the special "Hercules type", abrasion-protected through heating of the six steel strands and melting the polyester sleeve onto them, standard colour red

aluminium swages
double-conical aluminium swages with rounded-off ends

Net structure:

Hercules type ropes
combined from steel and polyester or polyamide yarn for the sleeve, 4 or 6 strands

S-clamps
neatly rounded Corocord® S-clamps made of stainless steel, Ø 8 mm

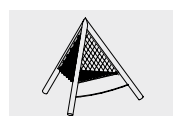

Dimensions

(small deviations possible)

height	2.60 m
height of net	0.85 m
length	3.05 m
width	2.70 m
weight	on request

Please refer to the price list for a more detailed explanation of the quality characteristics.
