

Play value

This unusual play equipment has a strong artistic expressive character due to the lively design and the graphical effect of the layout of handrails and ramps. It is suitable to be the centre-piece of a wide play area. Children are fascinated by the construction with its higgledy-piggledy small spaces and different levels where one is lying on top or below the other and which cannot be understood at first glance. The multitude of ramps invites children to run and jump on them; it is great fun to play tag or hide and seek in a very special way.
